The EDiS Idea

The people

A team of open minded experts, well-trained and aware of how important it is to keep up with changes, requirements of markets and uses who are more and more sophisticated and demanding.

The forming of such men is followed by EDiS which prepares them and constantly keeps them up to date to make them the ideal partners of their own customers.

The products

Technical articles, hoses and couplings, rubber and plastic materials, safety products: a large variety of supplies characterised by quality and competitive prices. The EDiS products are a safe investment owing to the continuous research of the best supplying sources. The constant selection of the innovative proposals, the presence of warehouses in various European countries and a deep distribution of products are three other main points in the EDiS cooperation.

The market

The aims of EDiS are to know each market to interpret their specific requirements, to anticipate the customers' necessities thanks to the exchange of partners and updating of products. Such aims are reached through a continuous monitoring, made by its members, about the evolution of customers' necessities in the different markets. The growth of group members will gradually cover all Europe and each member will operate in his own area.

The members

Austria – Haberkorn GmbH	4
Denmark – S&K GROUP A/S	6
Germany – Jäger Group	8
Germany – REIFF Technische Produkte GmbH	10
Italy – CENIgomma s.r.l.	12
Netherlands – Imbema Group	14
Norway – TESS as	16
Poland – Tubes International Sp. z.o.o.	18
Spain – Comercial Gasso S.A.	20
Sweden – Lundgrens Sverige AB	22

Facts

- Established in 1932
- Family owned
- Strategic business units:
 - Industry
 - Construction
 - Special product lines
- Austria's largest technical retailer
- Leading player in Eastern Europe (CEE)
- Multispecialist – from personal protective equipment, divers technical products to lubricants
- Innovative logistic services and e-business solutions

Facts

- Founded in 1942 by Arnold Jäger sen. as Arnold Jäger – rubber products, asbestos, industrial and mining supplies, later Gummi-Jäger
- 2007 the company is reorganized as Jäger Gummi und Kunststoff GmbH. The divisions automotive technology and environmental technology are spin off as independent companies.
- Jäger Group:
23 locations in 8 countries, incl. 6 production sites:
 - Production of Single-and multi-component molded rubber parts
 - Production of single-and multi-component profiles
- Focus branches:
 - Mechanical Engineering
 - Renewable Energy
 - Agricultural Engineering
 - Automotive
 - Envirotech
 - Exploration Technology

Facts

- TESS has solved problems for the industry since 1968
- TESS by far the largest hose supplier in Norway
- Higher sales volume than no. 2, 3 and no. 4 accumulated
- TESS outlets at more than 115 locations in Norway with approved hose workshops + Aberdeen, Esbjerg, Houston, Brazil, Singapore
- TESS makes more than 800.000 deliveries yearly
- WW Hose management service program
- Technical division for hydraulics, welding and subsea
- Strategic management and coordination of the industry's greatest program for service located in Drammen, close to Oslo
- QA-system according to NS-EN ISO 9001-2008
- HSE-system according to NS-EN ISO 14001:2004 and SN-BSOHSAS 18001-2007
- Registered name and trademark
- TESS, member of EDiS, NAHAD, ISA, NOSCA, Subsea Valley and Tradebroker
- TESS know JIT, e-commerce, Partnering and Integrated supply (Partnership and Partnerstock)
- Welding distributor and power center no. 1 in Norway
- Training for hose masters and certified hose assembler at TESS Academy

Nice to know

- The official language of EDiS is English
- All quotations to be made in EURO
- EDiS negotiate contracts on behalf of all partners. Orders shall be invoiced directly
- The purchase power of the members are more than 365 millions EURO per year

How to become a partner?

An EDiS partner should fulfill the following requirements according to EDiS Declaration of Intent § 3:

- From the supplying industry independent trading company
- Leading in his product range and territory
- Very good reputation
- The main product assortment should be in line with the other partners
- Corporate spirit has to be part of the company's philosophy
- Warehousing, stocks, customer service, quality guarantee, sales organisation and management should be well-developed
- The activities of the cooperation should be considered confidential and partly secret
- The partner shall not make misuse of confidential information and/or know-how of cooperative subjects
